Hi, I'm Sum Bunny.

I work with systems theory,
ethics, and archival practice,
using essays and experimental texts
to explore how ideas
behave over time.

I publish this work on
the **Internet Archive**
because it allows thinking
to exist without urgency,
performance, or optimization.

Not everything here is resolved.
Not everything should be.

You're welcome to wander.
Nothing here is locked.
Take what you need
or nothing at all.
